## DJI Flight Log Viewer

### Overview

This flight log viewer can be used to convert and/or view the data within **DJI GO TXT** flight logs, **DJI Fly TXT** flight logs, or **Litchi CSV** flight logs. After your flight log has been uploaded, you'll be able to view a summary of your flight, download a CSV file with more detailed information, and/or download a KML file (viewable with [Google Earth](#)) to view the flight path in Google Maps.

**Note:** See the **Locating Your Flight Logs** section below if you need help finding the flight logs on your mobile device.

**Note:** This log viewer is not able to process DAT flight logs. Most DAT files can be read with [DatCon](#).

### Upload Your Flight Log

Click the "Browse..." button below to select and upload your **DJI GO TXT** flight log (e.g. "DJIFlightRecord\_2016-02-12\_[15-33-10].txt") or your **Litchi CSV** flight log.

### Locating Your Flight Logs

Follow these instructions to locate the flight logs on your mobile device:

- For **Apple** mobile devices, follow [these instructions](#) to retrieve your DJI GO TXT flight logs from iTunes. After retrieving your flight logs, click the **Browse...** button above to select a flight log and upload it.

**Note:** If you're using Litchi, you'll want to select **Litchi** in the listed apps and retrieve the flight logs from the **flightlogs** folder.

- For **Android** mobile devices, connect your mobile device to a computer via a USB cable and go to **DJI\dji.pilot\FlightRecord** (for DJI GO 3) or **DJI\dji.go.v4\FlightRecord** (for DJI GO 4).

**Note:** If you're using Litchi, you'll find the flight logs in the **LitchiApp/flightlogs** folder.

**Note:** If the log files are not visible or you're not able to find a specific log file that should be there, then install and run [SD Refresh](#) or restart your mobile device.

- For the **Phantom 4 Adv/Pro +** remote controller or **DJI Smart Controller**, connect your remote controller to a computer via a USB cable and go to **DJI\dji.pilot.pad\FlightRecord** . If needed, you can find detailed instructions [here](#).

### Getting Help With Your Flight Logs

If you need help, please create a new topic in the [DJI Drone Help forum](#). If you have questions about a specific flight log, please upload it above and include a link in your forum topic to the page that opens after uploading your flight log. It would also be helpful if you include as much information about your flight as you can remember.
